
THE THIRD OFFICIAL ACORN USER EXHIBITION

25th-28th July 1985
Barbican Centre, London EC2.

BROCHURE & STAND GUIDE

50p

WIN A PRINTER
DETAILS INSIDE

'THIS one will run and run. That statement was originally made about a play, but it might just as well be applied to the BBC micro and its offspring, the Electron. As Editor of Acorn User for the past three years I have seen a devotion and enthusiasm to a product unequalled in my experience, with a commitment and growth of an industry to match.

What users of any other product would phone a magazine at eight o'clock in the evening -- on Christmas day? Car enthusiasts might spend their Sunday mornings polishing the delight of their lives, but Acorn users program, test, play, zap, enthuse and tear their hair out 24 hours a day. What other magazine can claim that 8,000 people entered a competition that required weeks of programming to win?

The BBC micro was the spearhead of a national computer literacy scheme that has yet to be matched anywhere in the world. And after more than three years it is still going strong. In its wake it has led to many firsts and introduced the British public to computer hardware in a way unheard of before. Although many will decry Acorn's disc filing system, the BBC micro introduced disc drives into our homes -- followed by monitors, printers, modems, mice, and trackballs. The software has led home computers into uncharted territory from wordprocessors to games. Teletext, telesoftware, Micronet, electronic mail, the list And what about the way the micros are used? It is difficult to walk into a school, hospital, industry or business that has not been affected -- or even revolutionised -- by a BBC micro or Electron. From astronomers to speech therapists, magicians to blast steel furnacemen, they are all using BBC

micros and Electrons.

But after three years of outrivalled success in the computer industry, our two biggest micro manufacturers have had their troubles. And there's nothing like the British media for kicking people when they're down. However, Acorn now has Olivetti to hold its corporate hand. The BBC scheme still has three years to run, the Domesday Project has thousands of children running around Britain to expand the frontiers of video technology. Will it ever end? Not as long as people can think up ideas to stretch the capabilities of all the micros Acorn has built, and continue to develop and produce.

The results of all this trailblazing and the unstoppable enthusiasm are amply demonstrated by the commitment to Acorn User magazine and in this, the third Acorn User Exhibition. The users of half a million Acorn computers are simply not going to lie down and go away. Their micros are going to carry on RUNning. If ever there was a computer equivalent of the Volkswagon, then Acorn makes it.

TURN YOUR BBC MICRO INTO A PROFESSIONAL MICROPROCESSOR DEVELOPMENT SYSTEM

THE OPERATING SYSTEM

- FLEX—The Professional Operating System
- Versatile, Flexible & Powerful, the ideal operating system for industrial control
- Provides the power, sophistication and ease of development, previously only offered by larger, more expensive systems

THE HARDWARE

- 6809 Advanced 16 Bit Processor
- Choice of Industrial Interfaces for Target Applications:
  - —High Resolution Colour Graphics
  - —Industrial input/output boards
  - —IEEE communications
  - —and many more

THE TOOLS

- PL9—A fast, efficient control language
- CMS FORTH Interpreter & Compiler
- Cross Assemblers for most 8 bit & 16 bit micro's
- "C", BCPL, PASCAL

THE SUPPORT

- Top rate after sales technical support
- Systems / Hardware Design

Alpha Disc Ltd./Chase Data Ltd., are a group of companies specialising exclusively in the service and sales of Computer Disc Drive sub-systems.
With some seven years experience in the maintenance of disc drives for the computer industry we feel justifiably qualified in offering a professional service for our customers.
Having established credibility in this field we are able to purchase quality products direct from Japanese manufacturers at the most competitive prices, and unlike many of our competitors, we will support our products beyond the one year all inclusive warranty.

A & B COMPUTING
1 Golden Square
LONDON
W1
Tel: 437 0626
Stand No. 39

A & B Computing has been serving the owners of BBC Micro's for over two years, upgrading from a bi-monthly publication to a monthly in September of 1984.
In the Autumn of 1983 the Electron arrived and A & B met the challenge of the demanding computer industry with Acorn themselves.
A & B enthusiastically reported and informed owners of the latest news and reviews of this ever progressing/changing industry.
The content of the magazine reflects the diverse interests of BBC and Electron owners.
Education, business, languages, games and utilities are examined by professionals and the points of view are impartial but thorough - and accurate.

Collings/Hill MacGibbon also publish Microspecial, a unique life skills resource pack for schools.
A variety of books for the micro enthusiast is also available, published by Collins.

UP TO 32k SIDEWAYS RAM BOARD

FOR THE BBC PLUS CAPABILITY OF WRITE PROTECTION INCLUDED

This RAM board comes complete with 16k of RAM fitted and sockets available for an additional 16k RAM which can be fitted later by plugging in, this will give a total capability of 32k.

Plugs directly into socket 12 or 15 in BBC or will work in conjunction with HCR external RAM/ROM unit.

No soldering will be required and it has the extra bonus of a write protect switch to be mounted either in the reset space, rear of case or in spare LED position on right hand front of keyboard. A right protect switch is fitted to prevent corruption of data loaded into RAM.

Sideways RAM is intended to run sideways ROM type software of your own either under development or as an alternative to actually committing to expensive eproms.

Sideways software may be kept on disc and loaded into sideways RAM simply by typing *Load < NAME > 8000. The RAM can be loaded 16k at a time or by assembling to Hex 8000. A simple program is provided in the manual to transfer software (in RAM or ROM) into user RAM where it can be modified and written back to RAM or saved on disc. With suitable software RAM can be used as a printer buffer or as a data store, etc.

Supplied complete with 16k of RAM and easy fitting instructions £31.50 (£36.22 inc. VAT)
Further 16k RAM £10 (£11.50 inc VAT). **Please allow £2.00 P&P**

Also available: Internal 16 socket ROM/RAM card, External 28 socket ROM/RAM card, Eprom Programmer & eproms

ORDERS TO:
H.C.R. ELECTRONICS, Industrial Unit, Parker Road, Chelmsford, Essex CM2 0ES.
24 Hour Answer Phone Service:
Chelmsford (0245) 350188

EXTERNAL RAM/ROM CARD

THE NEW EXTERNAL 28 ROM EXPANSION SYSTEM FROM HCR ELECTRONICS

This extremely powerful but versatile machine has the capability of: 32K RAM & 24 sockets available for ROM *or* many various combinations to your personal requirements.
This machine has its own separate power supply which eliminates drain on the BBC's switched mode supply.
NO SOLDERING IS REQUIRED.

The unit consists of two modules:
1. An adaptor board to plug into the BBC sidways Rom socket 15.
2. The expansion case.

The case comes complete with an inbuilt power supply and one expansion card. This card will hold 12 Roms or a combination of Ram/Rom (Ram can be 6116's, 2016's or 6264's). This gives a total of 16 Roms (including four in machine).
A second board identical to the above can be fitted at a later date, giving a total capability of 28 available sockets for Rom or Ram.
The second board can be selected as an alternative to the first board, either by a switch on the case *or* via software control.

SOME ADVANTAGES
1. No soldering required.
2. No access into machine required after initial fitting.
3. No overheating problems.
4. Does not physically interfere with other internal expansion add-ons.
5. Built in power supply (does not overload BBC's supply).
6. Computer will still function with external box powered down or unplugged (using Roms resident in machine).
7. Will make available 32K Ram plus 24 Rom sockets at a varied combination to the customer's needs.

Cost unit complete with one board £75.00 + VAT
Second board £29.00 + VAT. Postage & Packing £3.00

Tel: 311 2555

The Computer Users Club on stand 1 table are offering the latest Business Disc Operating System.
This is completely compatible with existing Acorn Disc Systems and Torch/CPN/MCP or 6502 Second Processors.
For the duration of the show C.U.C. will be giving a £5.00 voucher which may be used towards the purchase of BS-DOS, and also a voucher towards a Rapid Access Database system utilising BS-DOS which costs only £4.00.
BS-DOS allows 256 files on one disc and works well with Wordwise or Prestel chips. Its files are readable both on Z80 CPN or BBC 6502 as required.

CONTROLLED ACTION
TECHNOLOGY SYSTEMS
101 St Martins Lane
LONDON
WC2N 4AZ
Tel 992 0385
Stand No. 130a

A programme pack called "ICPA" uses the successful world famous critical path analysis techniques for you to draw and calculate work schedules or project programmes as simple networks. The pack is interactive and allows you to update, modify and reschedule the networks so that critical project dates can be met.
It will enable you to describe work activities, highlight Critical Paths and give you printouts of activities, scheduled times, floats, earliest and latest starts and finishes and the network itself. You can also present the information in bar charts. All these results can be arranged in any order you want.
Using a BBC B microcomputer and second processor (Z80 or 6502) you draw your project networks in colour simply with a joystick and single or double key commands. The screen issues prompts and messages and there is a Help facility always accessible.
The complete disc pack and comprehensive user manual manual costs £150.00 + VAT.

CUMANA LTD
Pines Trading Estate
Broad Street
GUILDFORD
Surrey GU3 3BH
Tel: 0483 50312

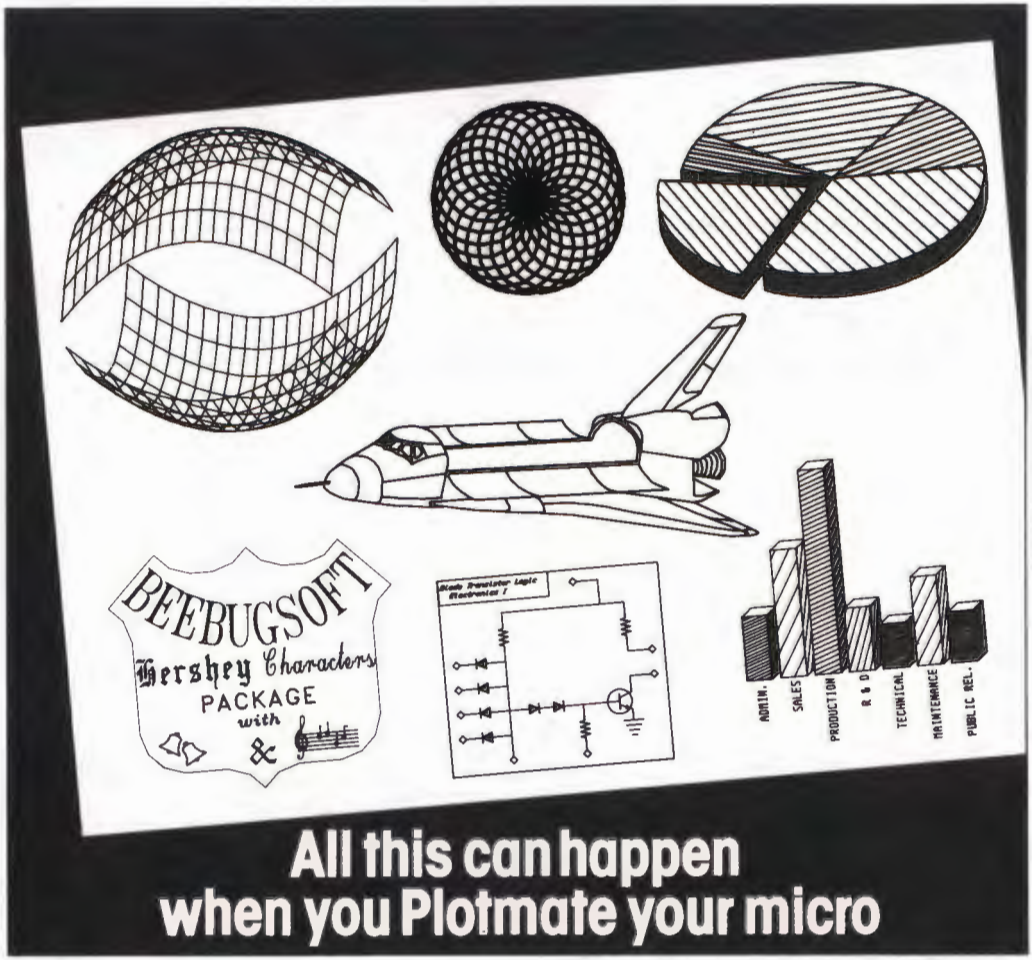
Stand No. 105

The amazing Demon Modem, the magnifying Megarule and a good selection of other products will be available. Dealer Deals promises some amazing deals and prices especially for the exhibition.



All this can happen when you Plotmate your micro

Plotmate is new. Excitingly new.

It's a rugged, responsive flatbed plotter with a lot of built-in magic.

You can use it to create fantastic patterns. Some small as a postage stamp. Or big as an A2 poster.

It'll produce overhead transparencies for you. And all dimensions of graphs, diagrams and charts.

It'll also prepare maps. Then put the contours in.

And that's only part of it.

You should see its repertoire of characters – a whole sci-fi population for you to manipulate.

Plotmate software accepts all the colour, vector, character and graphics commands of your BBC micro.

You just plug it in and away you go. All for less than £300.*

Phone 0702 541664 for details. Get Plotmating soon.

Wilts SP3 6HJ
Tel: 0747 870500
Stand No. 55

"Designed to cope with the problems which others choose to ignore" is the slogan for the Ergon computer trolley. Since its launch at last years show its many users have enjoyed its benefits in school and office - particularly the uniquely neat way the cables and leads are managed.
Thanks to a continuous slot in the upper surface, no wires hang out. Whats more, it offers really effective use of space - not just shelves - to hold printer paper, software and extra equipment securely.
The trolley is exceptionally stable and robust, has rounded edges and will pass through narrow doorways. 3-inch rubber-tyred castors, stabilising feet, and a fixed 4-gang socket block, cable and plug are provided as standard. Lockable sliding doors are available as an extra.

GEMINI MARKETING LTD
18a Littleham Road
EXMOUTH
Devon
EX8 2QG
(0395) 265165
Stand No. 162

If you are a serious user of the BBC micro, then a visit to Gemini's stand is a must. We shall be demonstrating our fabulous new 'Triple-D' suite (see advertisement in this guide), comprising a disk based database, spreadsheet and business graphics - all with a common file structure. Thus for example, data from the database can be loaded directly into the spreadsheet, and data from the spreadsheet into the graphics etc.
Making use of the BBC's random access filing system, this suite of programs really must be the last word in utility software - each module is sensibly priced at £29.95 and a combination pack containing all three modules costs only £69.95.
Come and see us if youre looking for professional software - youll be glad you did.

GEMINI DON'T HANG AROUND

Whilst we're proud to stand and admire our tried and tested range of serious software for the BBC micro — we don't hang around. Our development team are all too aware of the need to keep up with the demands of tomorrow's user and so we are pleased to introduce to you the ***'TRIPLE-D'*** system.

At last, TOTAL INTEGRATION and data file compatibility between the three most important utility packages for your BBC micro disk system — Database, Spreadsheet and Graphics. Take a look at the specification.

THE REVOLUTIONARY 'TRI

Of great significance to businessmen, educationalists and hobbyists alike, these programs are certainly the most powerful and sophisticated of their breed, and may be used 'stand-alone' or together as a suite. Gemini have probably the most experience in writing serious software for the BBC micro, with classics such as BEEBCALC and BEEBPLOT achieving sales of tens of thousands of units. We have drawn on almost four years of experience and user feedback to produce what we are confident will be hailed as the ultimate in functional software for the BBC micro: the ***'TRIPLE-D'*** Integrated Suite. We've also brought it in at a price that should make it accessible to more of you, and most importantly, we're giving you REAL value for money.

DDD-BASE *£29.95*

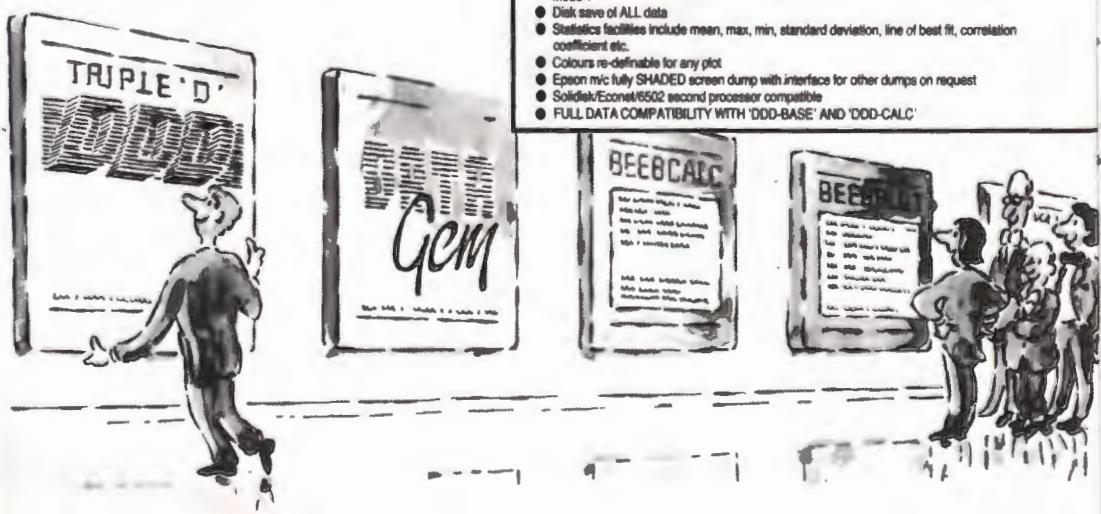
- Up to 2000 records, 1 search level subset, 26 fields/record, 2 drives, 79 chars/field
- Scrolling screen, 79 x 26. Interrupt driven real-time clock
- Layout painted on-screen to your design, including background text/graphics
- Fully menu driven, with powerful line editor and access to *OS commands
- Default entry capability, no need for tedious re-typing of repetitive data
- Lightning search using advanced 'hashing' techniques
- Powerful maths, allowing all BASIC functions, on any field
- 10 user-defined variables to simplify complex calculations
- Multiple level 'intelligent' sort — program only sorts 'out-of-order' data
- Printed reports in record or summary format. Data spool option for transfer to other files
- Solidisk/Econet/6502 second processor compatible
- FULL DATA COMPATIBILITY WITH 'DDD-CALC' AND 'DDD-PLOT'

DDD-CALC *£29.95*

- True disk-based spreadsheet, 2000 rows, 26 columns, 52000 cells. Powerful line editor
- Fast, smooth machine code screen scroll with pop-down menu
- Individually adjustable column widths with text overflow
- Full relative and absolute replication
- Find and move to a row by name
- User defined variables, delete/insert rows, SORT rows with 'DDD-Base'
- Send data from all or part of sheet to printer, or just print cell formulae
- Data over 1 or 2 drive surfaces
- Fast recalculation, even over large files
- All BASIC functions allowed, plus 'SUM', 'MAX', and 'MIN'. *OS calls, and real time clock
- Data spool option for merging with other files
- Solidisk/Econet/6502 second processor compatible
- FULL DATA COMPATIBILITY WITH 'DDD-BASE' AND 'DDD-PLOT'

DDD-PLOT *£29.95*

- Stunning menu driven colour graphics using the BBC's capability to the full
- Pie charts, histograms, scatter graphs, line graphs and function plotting
- Disk save of screen for instant recall within your own programs
- Superb data entry editor with up to 255 plottable data entries for text and x/y coordinates
- Automatic scaling with user override
- Screen customisation allowable after plotting for background text etc., with up to 64 columns in Mode 1
- Disk save of ALL data
- Statistics facilities include mean, max, min, standard deviation, line of best fit, correlation coefficient etc.
- Colours re-definable for any plot
- Epson m/c fully SHADED screen dump with interface for other dumps on request
- Solidisk/Econet/6502 second processor compatible
- FULL DATA COMPATIBILITY WITH 'DDD-BASE' AND 'DDD-CALC'



PLE-D' BBC DISK INTEGRATED SOFTWARE SYSTEM

The modules, which are formatted for both 40 and 80 track systems, are available separately, or as an economical combination pack. Each module is clearly documented with a comprehensive, indexed manual, with training sections that refer to demonstration applications provided with each disk. Remember, ***'TRIPLE-D'*** uses proper random-access files that will take advantage of your true disk capacity, even over TWO drive surfaces. Have you ever heard of a true disk-based spreadsheet before? Well it's here now in the form of the ***'TRIPLE-D'*** suite and can handle up to 52,000 FILLED cells! If you already have our 'DataGem' ROM database, you'll be pleased to know we've even included some special utilities for you!

I confidently recommend the ***'TRIPLE-D'*** suite to you. If you purchase the product from us and don't share my enthusiasm, return it to us in new condition within seven days of purchase and we'll refund your money – immediately and without quibble.

MAXIM COMPUTER SYSTEMS LTD
96 Lexham Gardens
LONDON
W8

01-373 3684

Many people believe that assembler is a "professionals only" language.
This is quite untrue. ANyone who can learn basic can learn assembler.
It is faster, shorter and ideal for handling hardware.
That is why professionals use it.
Maxim is a new 16k assembly system. It brings some of the most advanced assembly facilities to the microcomputer. It makes machine-code manageable.
It allows interactive programming from the keyboard. Labels are displayed and used during debugging.
It also allows the basic interpreter to be used.
If you would like to know more, come and ask us or try it out.

SHEFFIELD
S Yorks S13 9LS
0742 696863
Stand No. 62

Superdraft is a powerful drafting package developed by Peak Systems Design Ltd, for BBC/TORCH computers. It has functions which include:

- text at any position, size and angle
- zoom, move, scale, rotate and reflect
- location of objects and intersections
- automatic parallel, perpendicular, radial and tangential lines
- crosshatching
- dimensioning
- arc-blending and curvefitting
- symbol libraries (predefined and user-definable)
- calculation of areas, perimeters, moments, CG and principal axes.

Complete systems, including plotter, digitiser and twin 400k drives, start at around £3,500. The Superdraft software itself costs £950, all prices excluding VAT. Contact Peak Systems Design Ltd, (0742) 69683.

PILOT ONE LTD

ROBOCOM LTD
Clifton House
Clifton Terrace
LONDON
N4 3TB
Tel: 263 8585
Stand No. 133/140

ROBOCOM, market leaders in low cost CAD, will be launching their new BITSTIK 2 Technical Drafting system at the Acorn User Show. Designed from user feedback on earlier systems, the program combines impressive drafting facilities with unique user-friendliness. BITSTIK 2 will be the first professional CAD system to operate on the Beeb.
BITSTIK 2 represents a significant step forward from the successful BITSTIK 1 Graphics System currently available for the BBC Model B.
Plotter software is now available and will also be seen at the show.
Although eminently suitable for all drafting disciplines from architecture to circuit design, BITSTIK 2 is expected to find particular favour with the educational fraternity, as many schools and colleges already use BBC Model B's in their classrooms.

SHARDS SOFTWARE

The drives are cased and fully tested at our factory in London where you can purchase by mail order or by calling personally at the premises. Viglen also offer full servicing capabilities and are a very helpful and friendly company.
Viglen also recently branched out to supply printers and monitors of exceptional value.
NEWSFLASH: Ask about the latest ROM Cartridge System, Remote Keyboard and Eprom Programmer.

VINE MICROS
MARSHBOROUGH
Near Sandwich
Kent
Tel: 0304 812276
St and No. 129a

Following the launch of their successfull T.D.ROM earlier in the year, Vine Micros have scored yet another first in the field of tape to disc transfer. This brand new system is more sophisticated than the T.D.ROM in-as-much that is is 100% effective and has a mid-play 'stop-and-save' facility. It will he more costly than the T.D.ROM, and is not intended to be a replacement, Vine Micros, however, will be offering an exchange facility for present users wishing to upgrade to the new system.
The T.D.ROM and the ADDCOMM Toolkit and graphics ROM will also be on show

WATFORD ELECTRONICS
250 High Street
WATFORD
WD1 2AN
Tel: 0923 37774
Stand No. 41/41a

SHOW TIME IS LAUNCH TIME WITH WATFORD
It is sometimes said that software 'makes' a machine, but Watford Electronics realise that of equal importance is comprehensive hardware support. Following the launch of five software packages at the last Micro Show, Nazir Jessa (Watford's MD) is pleased to launch three more hardware products to the range that has already made Watford Electronics a household name amongst BBC users. These products are 'Le Modem', 'The Delta Card' and 'Watford Real Time Clock' (RTC).
Le Modem - The complete package for auto dial, auto answer, multiband rate, totally software controlled communications with a BBC micro.
The Delta Card - 'Fourth Generation BBC Hardware', increases the speed of your BBC by up to 100% as well as providing another 48k of RAM.
The Watford RTC - with battery backup offers full dete and time facilities with extensive software support.

WESERVE
128 West Street
PORTCHESTER
Hants PO16 9XE

New Robo Bitstik 2 tunes in to the BBC...

At last a full Computer Aided Drafting System for your BBC Model B Micro.

Introducing Bitstik 2, the first system to bring sophisticated CAD techniques to the desk of the BBC Model B user.

Bitstik 2 is the affordable solution to your technical drafting problems. Designed to take full advantage of your BBC's powerful graphics facility, the system is easy to learn and fast to operate.

Bitstik 2 incorporates a range of impressive functions, clearly displayed on-screen as Menus and Palettes. These are selected via the Bitstik hand controller, which also controls the dynamic 'rubber-banded' drawing cursors.

Among the system's impressive list of capabilities are:

- ▶ Auto Dimensioning
- ▶ Adjustable Curves
- ▶ Precision Grids & Angle Locks
- ▶ Powerful Zoom And Pan
- ▶ Scale Drawing & Text
- ▶ Graphic Library Index

These advanced features represent a significant step forward from the existing and very successful Bitstik Graphics System. Yet Bitstik 1 users can obtain Bitstik 2 at a Special Upgrade Price.

Bitstik 2 is produced in the UK by Robocom, the people behind the best-selling Robosystem family of CAD packages for the Apple II (+ or e) micro. To run Bitstik 2 you will need a BBC Model B with 6502 Secondary Processor, Twin Disk Drives and colour or monochrome monitor. Quality hard copy can be produced from a wide range of supported plotters.

So whether you need to produce complex architectural plans, detailed circuit diagrams or teach CAD on a fully implemented CAD set-up (with scope for advanced project work) you ought to be tuning into Bitstik 2 for your BBC...

Hotline Support
With Robo, advice doesn't stop when you've purchased a system. A small yearly subscription ensures that lifting your phone puts you in touch with expert help on any problem.

Test draw a Bitstik
See how the Bitstik can make your drafting projects easier. Just try it out, with no obligation to buy. Ask your local Robocad Centre for details of our free Test Draw a Bitstik Offer.
DIAL 100 AND ASK THE OPERATOR FOR FREEPHONE ROBO. WE'LL PUT YOU IN TOUCH WITH YOUR LOCAL ROBOCAD CENTRE.
