THE MASTER RAMBOARD

USING SHADOW RAM, SLOGGER PRODUCE THE FIRST EVER

6 4 K E L E C T R O N

The MASTER RAMBOARD from SLOGGER gives you a massive 28K free for BASIC programming or over 28,000 bytes free when using STARWORD, VIEW or an equivalent Word Processor, even VIEWSHEET is transformed in the same way. As well as the fantastic increase in FREE SPACE you now also become the owner of a PRINTER BUFFER only before available in the form of SIDEWAYS RAM.

Gives power almost equivalent to a Second Processor but with far greater compatibility. In fact, SLOGGER's MASTER RAMBOARD is compatible with all existing ELECTRON Software as well as all the add-ons available.

The ELECTRON will be given speed comparable to that of the BBC when using it in the correct mode so that ELECTRON-COMPATIBLE BBC games that run very slowly now become far more enjoyable.

Available in kit form from Slogger Ltd or any of their authorised Dealers. SLOGGER'S UNIQUE 7-DAY INSTALLATION SERVICE applies to the MASTER RAMBOARD whereby your ELECTRON is sent to us FREEPOST and then returned containing the MASTER RAMBOARD within seven days of us receiving it.
