0.75 mm (320 x 256 Pixels + Menu Area)
- ACCURACY
Same as resolution
- REPEATIBILITY
Least Significant Digit
- OUTPUT RATE
Up to 6000, X-Y points/second
- INTERFACE
Parallel
- CO-ORDINATES
Absolute
- ORIGIN
Lower-left corner

OUTPUT MODES

- POINT
Pen switch initiates a single X-Y point
- STREAM
Multiple X-Y pairs are output as long as the pen switch is held down
- POWER REQUIREMENTS
+ 5V 250 MA
- DIMENSIONS
Height - 25 mm Width - 350 mm Depth - 260 mm
- WORKING AREA
240 x 192 mm + Menu Area
- WEIGHT
0.8 kg (Tablet) 1.2 Kg (Gross)

APPLICATION AND SOFTWARE

The applications of the GRAFPAD are only limited by the users imagination. It adds a new dimension to computing and computers which could be used from CAD (Computer Aided Design), e.g. circuit, kitchen, shoe, carpet designs to simple drawings, e.g. apple or as a MOUSE and KEYBOARD.

The GRAFPAD software is provided to offer simple methods of drawings and savings. These programs will give the user enough information to create his own application programs by using the GRAFPAD.

PROGRAM-1, displays the X and Y co-ordinates for any point in the drawing area on the screen. These co-ordinates are based on the screen which has a grid size of 1023 X 1279 pixels, and also in the GRAFPAD mode with grid size of 320 x 256 pixels.

PROGRAM-2, contains the following utilities:

- a) Circle drawings, given the centre and radius with Fill facilities.
- b) Squares and rectangles by fixing one corner and enlarging it by moving pen to any point which incorporate the Fill facilities.
- c) Free-hand, erasing and line drawing with different colours in any direction all over the screen.
- d) Any design or picture could be saved on cassette or disc file, and dumped to printer.

Coming Shortly - A Family of Educational Software
