

Doublemode have solved the problem of expensive colour monitors for use with computers such as the BBC and Electron, with top quality re-cycled televisions fully adapted and converted for computer use – all at very, very competitive prices.

Based on a branded, well proven British chassis for high reliability Doublemode monitors are probably the best buy in computer monitors today.

The 20" monitor is ideal for the domestic user giving a freedom from the constraints of using the television monitor. Businesses too can benefit by reducing the outlay on computer hardware.

For educational use the system is ideal. Big screen 22" and 26" colour monitors increase the enjoyment and learning potential of pupils undertaking computer studies, while the fact that Doublemode monitors are considerably less expensive than other monitors also allows a lower pupil to monitor ratio which can be

of particular value in group activities. In addition, generous educational discounts are available.

- British Chassis, factory reconditioned and tested to BSI standards.
- Mains isolating transformer with 5 YEAR GUARANTEE
- Available in screen sizes 20", 22" and 26".
- Lead supplied with each monitor to suit BBC or Electron computers.

3 MONTH REPLACEMENT GUARANTEE ON EACH MONITOR

Discounts available for educational and computer club use.
Trade enquiries welcome.
