TABLER

TABLER is a new database program for the BBC Micro with disc drives.
It doesn't use valuable memory to hold the data but keeps it stored on
disc in a very efficient form. In addition to extended listing options
tables can be generated from the database files, selecting only the
records and fields that you specify. Ideal for storage and
manipulation of large amounts of data, TABLER will find uses in
schools, laboratories, clubs and the home. Look at just some of the
features that TABLER has to offer :

DISC-BASED DATABASE LEAVES THE PRECIOUS MEMORY FREE FOR VERY
SOPHISTICATED SOFTWARE
