

BRAND NEW ROMS FROM BEEBUGSOFT

SLEUTH

Basic Debugging Tool £29.00

This must be the ultimate debugging tool for the Basic Programmer. SLEUTH allows you to single step through your Basic program instruction by instruction and has full dual screen facilities. At any time during program execution you may display or update the values of any variable, set breakpoints, adjust the run speed, list the program, use an advanced trace facility and even specify which line should be executed next.

HELP

The Information Rom £25.00

The HELP Rom is a detailed on-screen programming aid. Just plug it in and every time you can't remember which VDU code to use, what the parameters for a Basic command are etc, the HELP Rom will provide an instant answer. Just type, for example *H VDU, *H HIMEM, *H FX4 etc.

MUROM

Sound Extension Rom £29.00

Create your own tunes and sound sequences with ease. MUROM will help you to exploit the sound capabilities of the BBC Micro to the full, producing interrupt driven music which may be played back while your machine performs other functions.

SPELLCHECK II

Wordwise/View
Spelling Checker
£31.00

provides an automatic spelling check for letters or documents created on wordwise or View. It is extremely fast, checking about eight words a second, easy to use and allows your text to be corrected and saved away for later use.

EXMON II

Machine Code Monitor £29.00

60 new machine code commands to speed up the development and testing of assembler programs. EXMON II features dual screens, breakpoints, a full screen memory editor, single stepping, a relocater, block verification and much more.

TOOLKIT

Basic Programmers Aid
£27.00

Released earlier in the year TOOLKIT is the best selling Basic programmer's aid from Beebugsoft. This Rom will save hours of development time. It was reviewed in Micro User October 1984 as "An excellent programming aid" and was rated highest in Acorn User October 1984 when compared with 4 similar utility roms.
