

STARWORD

**A ROM based Word Processor
for the Acorn Electron**

The STARWORD ROM based word processor plugs into an Electron ROM extension unit such as the Slogger ROMBOX and provides powerful, comprehensive and easy to use word processing facilities for large and small documents.

- **132 character print line.**
- **All standard word processing facilities.**
- **Bold, wide, underscore and many other print controls.**
- **Mailmerge facility for personalising standard documents.**
- **Easy to follow and detailed user manual.**

Designed for students, business people or engineers, STARWORD enables those with limited typing skills to subsequently edit, check and print using the Electron as an "intelligent" typewriter.

Using STARWORDS' copy and delete facilities, blocks of text can be re-arranged and also justified and unjustified if required.

Function keys can be programmed for frequently used command sequences, words or phrases and word search enables errors to be found quickly and corrected.

Slogger also produce other items of ROM based software, add-on hardware such as the ROMBOX ROM extension unit and computer games. Information on any Slogger products may be obtained from **Slogger Limited, 215 Beacon Road, Gatham, Kent. ME5 7BU. Telephone: 0654 811654/41622.**
