 USUAL PRICE ~~£29.90~~

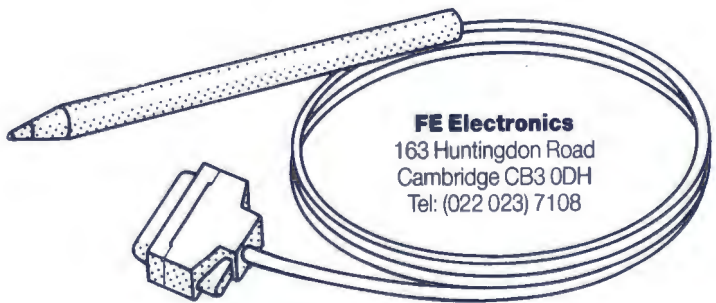

Designed by Carrads Graphic Design, Cambridge (0638) 742449

The FE Electronic's Lightpen for the BBC Microcomputer

This lightpen enables you to draw directly and easily onto the tv monitor screen in black and white or in colour.

No interface required, it plugs simply and neatly into your BBC Micro's A to D socket. The push tip action of the pen means simple pin point accuracy. The pen is robustly made and great fun to use.
