The Wordwise Applications Guide

Are you sure you are getting the best out of your Wordwise chip? The Wordwise Applications Guide (£7.00) will help you to solve all those niggling little problems.... "Why does it....?" and "How can I get it to.......?" It will also show you a wealth of new applications. Indeed, if you buy this book you may find you don't need to up-grade to Wordwise Plus!

Using Wordwise Plus

Those who have already got Wordwise Plus will realise that there is a huge gap between the two books that come with it. "Using Wordwise Plus" will help to fill that gap. It gives help with editing, formatting, use of function keys (omitted from 1st edition of WWP Reference Manual), use of printers and lots more. The applications from the Wordwise Applications Guide have been transferred across to Wordwise Plus but many of them have also been translated into segment program form.

Wordwise Plus Programming Ideas

If you have already made some attempts to learn how to use the Wordwise Plus programming language, you will be aware that although the Reference Manual contains a great deal of information about the language, it does not really give you a lot of help if you are starting from scratch. The Wordwise Plus Programming Ideas book gives you some of the principles of the new language and then gives a whole range of working programs for various applications (address sorting, label printing, standard letters, invoicing etc). It also gives a range of programs for use in program development and de-bugging, and there is also a large section of hints and tips. All the programs are carefully described so that you can learn by example and they are also carefully structured to make them more easily readable and adaptable to your own particular applications. This book is written by Paul Beverley and based on the programming experience of Rob Pickering of Computer Concepts.

Each of these books costs £7.00 and is complete in itself, but there is a disc available for each book which will save you typing in all the programs and data files. Each disc costs £5.00 and can be purchased separately. (Please specify 40 or 80 track.) These prices are inclusive of VAT where applicable and are sent U.K. post free.

These products are normally available by MAIL ORDER ONLY from T.E.R.Roberts, Lamorna, The Street, Bunwell, Norfolk, NR16 1NA. Cheques should be made payable to "T.E.R.Roberts". However, they will also be available from Norwich Computer Services at the Acorn User and Micro User Exhibitions.
