Lendac Pluto ROM

By adding the Lendac Pluto ROM and Lendac Pluto Interface Board to a BBC Micro (or B+, Acorn Cambridge Workstation or Master), you can control Pluto Graphics Boards with ease. Pluto Graphics Boards are renowned in the industry for their high speed, impressive resolution and dazzling array of colours. The Lendac Pluto ROM's specifications:

- Drive any Pluto Graphics Board (Plutos I and II are both supported).
- All of BBC BASIC's graphics commands (PLOT, DRAW, POINT, etc) are supported and straightforward access is provided to those features of Pluto which have no counterpart in BBC BASIC.
- A "graphics compiler" is included which allows very speedy regeneration of pictures. For Pluto IIs a very economical compressed picture save and reload facility is provided.
- Up to eight user-defined character sets may be used. Facilities have been provided for centring and proportionally-spacing text.
- Several character sets are available, including Helvetica Light. A utility to define characters is provided in the ROM.
- Seventeen new '*' commands have been implemented which permit easy control of the character-handling and graphics compiler functions among others.
- Facilities are provided to manipulate digitised video images on Pluto II.
- There are two versions of the ROM available: one for the BBC B/B+/Acorn Cambridge Workstation and one which takes advantage of the superior facilities of the BBC Master series.
- Comprehensive documentation accompanies the ROM.

The Lendac Pluto ROM is available from:

Lendac Data Systems Ltd,
Unit 31,
IDA Enterprise Centre,
Pearse St,
