# INTRODUCING THE BEEBUG MAGIC MODEM

In the March 1986 edition of BEEBUG we reviewed the Magic Modem. This is what we said:

*"Using the software and the modem is simplicity itself"*

*"Simply a delight to use... performed perfectly... in my opinion the best terminal software yet for the BBC"*

It was also reviewed on Micronet 800. They said:

*"Lots of thought has gone into the design... certainly the best modem package for accessing Prestel via a Beeb so far!"*

**We were so impressed by the quality of this modem and software that we have negotiated a special offer for members.**

## THE MODEM

Simply plug the modem into your computer with the lead provided and you are ready to go. Ideal for accessing Prestel, Micronet 800, Telecom Gold, Telelink, Homelink and hundreds of bulletin boards. Features auto dial and auto answer. You can even set up your own bulletin board with the Beebug Magic Modem. In fact this modem is already in use by several well known bulletin boards already.

## THE SOFTWARE

Supplied with custom designed communications software supplied on a 16k rom written by Soft Machinery. This enables you to auto dial, and contact any of the services (Prestel, etc.) that you may require. The software is truly excellent and features a mailbox frame editor, telesoftware downloader, frame tagging, load, save, print, etc. all at the press of a function key.

## PRICE

Modem (Inc. Auto Answer) software and lead **£109** inc. VAT  
Modem (Inc. Auto Answer) and lead **£94** inc. VAT  
UK carriage £2.00
