**DISKETTES DIRECT BY MAIL FROM THE MANUFACTURER**

**REFLEX MAGNETICS** are a new manufacturer who set out to design and engineer the highest quality and most reliable diskette ever made.

Each REFLEX disk carries a full Lifetime Warranty — and is certified 100% error-free.

REFLEX 5¼" diskettes are available in units of 50, either in 5 FREE modules of the unique interlocking DiskBank Filing System or a FREE LOCKABLE storage box, as shown above. Choose whichever suits your needs.

REFLEX 3½" diskettes are available in units of 30 in a FREE LOCKABLE storage box, as shown above.

Constructed of the highest quality materials available, each diskette is then individually tested to some of the most stringent levels known to industry.

REFLEX are already an established manufacturer and supplier to large corporations and industry. Now, we are making our high quality diskettes available to you by mail.

To order REFLEX diskettes simply fill in the coupon or order by telephone (01) 722 9231 (24 hour answering). Reflex will accept Access, Visa or cheques; official orders from Government or Education departments and Companies are also accepted.

Please despatch today: Prices include VAT & FREE delivery to your door.

# 9 reasons to trust your data to Reflex

## **Burnishing**

Our highly advanced VC3 Micro-fine Burnishing Technique provides an ultra-smooth surface, preserving both the drive heads and the diskettes, thus giving maximum head-to-disk interface.

## **Clip Level**

Our diskettes are tested far in excess of A.N.S.I. (American National Standards Institute) specifications — 40% is the recommended minimum clip level: our diskettes are tested to 70% clip level.

## **Unique 'Laser Check'**

'Laser-Check' — a further test and a Reflex development is performed by our unique 'Laser-Check' test which, by utilising the incredible precision of laser technology, ensures that the surface of the disk is flawless — guaranteeing 100% error-free performance.

## **100% Certified**

100% Full Surface certified — we check not only the tracks themselves but also between every track, which means greater Data Integrity and error-free performance.

## **Solid Seam Bonding**

Our jackets are solid-seam bonded—unlike the staple-sealing commonly used by other manufacturers. This eliminates 'flutter' and creates a totally protected environment in which the diskette is able to rotate freely.

## **Lubricant**

Reflex use a special lubricant which provides permanent lubrication over the entire surface of the diskette, coating not only the disk but also the inside of the disk jacket which functions as a disk lubricant reservoir, thus reducing friction against the drive heads and greatly extending the life of the diskette.

## **Antistatic Jacket Liner**

The new protective lint free and anti-static not only keeps the magnetic disc completely clean, but provides a virtually friction-free environment.

## **Reinforced Hub Rings**

The reinforced hub ring greatly extends service life of the diskettes and ensures precise alignment every time.

## **10 mil Jackets**

Our jackets are made from the finest, anti-static, PVC Homopolymer material. The 10 mil. thickness — as against most manufacturers' 8½ mil — provides the highest durability.
