# Amx Times

SATURDAY FEBRUARY 8th 1986

Unleash Your Creativity

With the fantastic AMX Mouse from Advanced Memory Systems Ltd, communicating with the computer is made much easier.

Hence, at last a low cost typesetter is now available that allows you to create complex A4 pages combining Text AND Graphics. Over 15 different typefaces will be supplied with the system to allow you to compose your own Newspaper or Poster. All by following simple commands on the screen and pointing to Icons and Labels. It is possible to load in Wordwise and View files which will be formatted as they appear on the screen, whether they are appearing as 80 column characters or a typeface of your choice!

Very versatile Spraying, Painting and standard Shape drawing facilities are also supplied. Cut, Paste and Zoom facilities allow professional composition of your work.
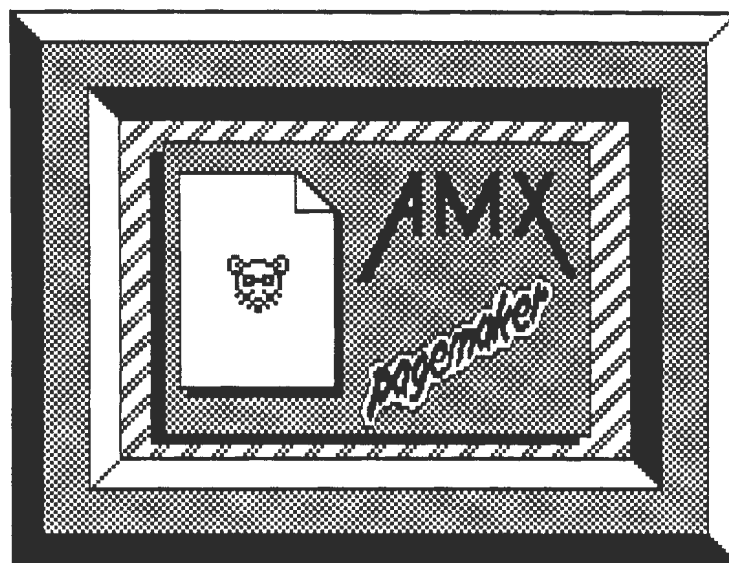

I'M A STAR !

You can Cut and Save any area of the screen, no matter how large or small. The cutout can then be re-loaded or super-imposed on top of what is already on the screen.

Versatile Printer Dumps are supplied to allow you to produce a full A4 page, or ANY part of a Page.

Digital Magic at Today's Show!

As you can see on the left, digitized pictures can be loaded into AMX Pagemaker where they can be composed to give some very professional results. The graphics options can be used to doctor pictures.

Just imagine the possibilities!

Pictures from all BBC Micro graphics modes can be converted for use with AMX Pagemaker using a special conversion program supplied with the package.

Therefore AMX Art pictures can be loaded and changed.
