

PLONKER BOX

The simple cost effective disk organiser for today's computer users.

Today's computer programs have become so large that they will not now fit onto one disk. Typically, any one program (wordprocessor, spreadsheet, database etc.) will spread onto two, three, or even four disks, prompting the user to change disks regularly.

Your desk is going to be covered with disks, and they will be exposed to the many hazards that make disks unuseable, such as finger prints, scratches, dust, and coffee. Having disks scattered over a desk is a dangerous practice.

The Plonker Box is designed to fit onto the computer system, and neatly stack current disks out of harm's way, ready for use.

★ Holds all standard disk sizes: 3", 3½", 5¼", and 8".

★ Keeps the desk tidy during frequent disk changes. Any one program can spread onto two, three or four disks.

★ Protects valuable programs and data from normal desk-top hazards, ie: scratches, dust, finger prints, coffee cups, heavy files etc.

MOUSE MAT

A valuable and economic accessory for the effective use of the 'mouse' device.

More and more computer systems and software packages now take advantage of the 'mouse', a pointing device which, when moved around a desk will move an arrow around on the computer screen. Buttons on the mouse when pressed will enable the operator to select, pick up and move items on the screen, so removing the need for many key depressions at the keyboard.

The 'mouse' operates on a rolling ball which becomes worn when pressed against the hard surface of a desk top. Worn roller balls (and sometimes brand new devices) can scratch desks.

Some desks or workstations are so highly polished

that the mouse slides rather than rolls over the surface. If this happens, the screen arrow will not move.

The Mouse Mat provides a cushioned, non-slip surface for the operation of the 'mouse'

- ★ Gives better grip for the rolling ball, and a better feel for the operator.
- ★ Extends the life of the rolling ball, which becomes worn when pressed against hard desk surfaces.
- ★ Prevents scratches on the desk top.

Order Form

Mouse Mats and Plonker Boxes are available from leading computer dealers and retailers.

For mail order despatch, please complete this form:

Please supply me	_____	Mouse Mats @ £5.99	Total
	_____	Plonker Boxes @ £4.99	
		postage & packing	£0.75
		Total	

I enclose my/our cheque (made payable to

Merit Computers Ltd.) for £ _____
