PHANTOM

Something strange has been happening, something unnatural.   At first no one took much notice, those who'd experienced it were considered crackpots by those who hadn't.   But now people are noticing, the so called 'crackpots' now outnumber the disbelievers.

And so the scene is set.   As a Professor of Astro-Physics with more than a passing interest in Psychic Phenomena you are well prepared for the situation.   Equipped with your experimental nuclear accelerator you prepare for what could be the world's final conflict, one dimension against the other, life versus death.

And so the war begins...............

This game, original in design and concept, is one of the new breed of role playing `games, that have rocked the Charts and the Arcades in recent months.   Now available for your Computer.

JET SET WILLY II

Whilst recovering in hospital from a severe fall down some stairs, Willy called in the builders. He thought it odd that they had green skin, but needing the work done in a hurry he asked them to remove the offending edges from his stairs. Trouble was, they did far more work than asked, adding several rooms to his mansion and then refusing to charge him!! Maria is demanding that Willy clears up the mess and he hasn't even found all the rooms yet. Who were these strange people? Why did they need to add a rocket room in Willy's already substantial house?

Much patience and stamina is required to explore the extended house and NASA's "Guide to Simple Space Travel" is recommended reading for those foolhardy enough to help Willy clear up all the mess. Be careful in the sewers and watch out for the bell ringer in the Belfry! Good luck!!

This game is for all the people who wished that Jet Set Willy was bigger and better. Some of the rooms may be familiar and those who played the original Jet Set Willy will have a head start with this very extended over 100 room game.

STARTER PACK ONE

Bozo the Brave – to direct Bozo through the three lands of havoc collecting in each a piece of the crown of the ultimate darkness.

Trek II – as commander of a federation star ship, your mission is to travel through the six galaxies in search of a long lost starship captain.

Space Caverns – fly your space craft through numerous caverns to reach your home base. Points are awarded the longer the player survives. Every time a round is completed the gravity is increased.

Cylon Invasion – destroy the oncoming cylon fleet before their energy bombs reach the earth. Each energy bomb which hits the earth will reduce the earth's shields until they glow red and eventually collapse causing the earth's destruction. Each wave gets progressively faster up to wave 10.

BBC/Electron – Cassette only – £8.95

POWER PLAY COMPETITION PRO 5000 JOYSTICK
This Joystick plugs directly into the analogue Port of the BBC Computer, dispensing with the need for interfaces and allowing instant compatibility with a wide range of existing BBC software.
Strong - Durable - 8 way microswitches for greater sensitivity, precision control - Two Large Fire Buttons for quick right or left handed operation.
R.R.P. £16.95   Tynesoft Price   £14.95

FIRST BYTE ELECTRON INTERFACE
The Leading Joystick Interface for the Electron with over 25,000 happy customers to date.
Add Joystick movement to most of your Electron games.
Comes complete with game conversion tape for use on some programs
R.R.P. £19.95   Tynesoft Price   £17.95

QUICKSHOT II Plus Joystick with Microswitch contacts and Auto-Fire. Ideal for your first byte Interface.

R.R.P. £12.99   Tynesoft Price   £9.95

MICROVALUE ELECTRON PACK

VINDALOO - A humerous Arcade Adventure
WET ZONE - A multi-level Arcade action game
RIG ATTACK - A Helicopter based Arcade game
ALPHATRON - A Space Scout Craft simulation.

FOUR GREAT GAMES FOR LESS

THAN A £1 A GAME   £3.99

AVIATOR   - a flight simulation on cassette for the BBC B

The flight simulator puts you in the pilot's seat of a Spitfire Mark II single seater fighter. You can make it fly just like the real thing - taking off, turning, climbing and landing.   In fact, you can do virtually all the things that the real aircraft can - loop the loop, rolling and any aerobatics you wish to attempt.   Take care though, because things can go disastrously wrong and you may find yourself struggling to regain control as the aircraft plummets towards the ground.

Incorporated in Aviator is a three-dimensional world ready for you to explore (map provided).   Your score is based on successful landings and tests of skill such as flying between skyscrapers or under bridges.   There is also a chance to repel unfriendly life forms from outer space both on the ground and in the air, a combined test of flying skill, navigation and tactics as you seek and destroy.

Acornsoft Aviator is fully compatible with either keyboard or joysticks - joysticks make life easier, but are not essential.   R.R.P. £14.95 **Tynesoft Price   £12.95**
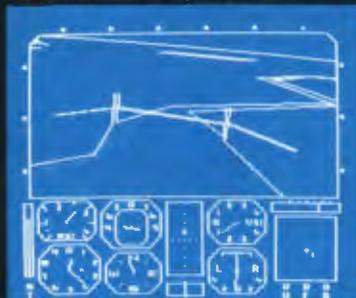

VINDALOO

Raj is the owner of an Indian take-away who likes to partake of his own Vindaloo curries. Unfortunately for him, he's eaten just one too many, and must find the W.C. which is at the bottom of his cellar (very quickly).

Raj's cellar is so large that it is made up of many rooms, you will have to guide him through these rooms to get to his ultimate goal!

SPECIAL OFFER PRICE   £2.99 - CASSETTE ONLY

3D Maze - Pit your wits against the computers logic in this highly realistic graphical game.   The computer sets up the logical mazes (you choose the size), and then it shows the view of the maze in 3D, each step you take as you battle against the clock to escape!

Peg Leg - Ahoy there. me hearties!   Travel round the Seven Seas collecting Pieces of Eight and cannon balls for your Pirate Galleon.   This highly colourful Machine Code Arcade Game will even have your parrot squawking for a turn!!

Hyperdrive - A new, very addictive Machine Code Arcade style game.   Guide your Laser Tanks around the network of passages, destroying the Drone Aliens - but beware, evil Otto lies in wait!

Super Hangman - The special feature of this version is the Hi-Resolution animated man.   Watch the expression on his face change as the noose tightens around his neck.   Marvel at the detail of his clothing - but don't take too long, he grows very impatient!   Contains many categories from educational to just plain fun!

Gunsmoke - A realistic 3D simulation of a heated Wild West street gun battle in which you will have to defend yourself against up to 16 enemy sharp shooters.

Super Pool - A superb Pool game with a difference. ' Features include time restricted shots, variable cue strength, superb real time graphics.

Blitzkrieg - A captivating 3D Tank warfare simulation with revolving exploding tanks, 3D shell fire, detailed scrolling landscape, high score ranking system and realistic sound.

U.K. - P.M. - If you have ever said "That Prime Minister - just give me the chance to run the country and I'll show you.."   Then here's your chance.   A superb program that will keep you involved for hours - don't just argue about politics, see what you can do about it !

Stratobomber - A new, highly colourful Machine Code Arcade style game.   Can you keep the enemy fleet at bay long enough to destroy the Nuclear Reactor of the Rogue Star Ship before it destroys your home Planet?   Superb graphics.

Invaders - A superb full feature adaptation of the arcade "Space Invaders" game in Machine Code and hi-resolution colour graphics.   Play normal game or choose from the many options including missile, bomb and invader speeds, invisible/visible invaders and shields/no shields.   Quite simply the best.

Caterpillar - Superb rendition of the popular Arcade game.   Features - Toadstools, spiders, fleas, scorpions, left/right and up/down base movement.   Very exciting game.

Vortex - There was no escape - he had to enter the Vortex and bet on his skills!   He grabbed the manual controls and with determination fired both upper deck guns !!

3-D Bomb Alley - A realistic 3D simulation of an explosive air-sea battle, in which you must defend a fleet of ships from attacking enemy aircraft.

Bouncing Bombs - Battle through the depths of the Intergalactic vortex to reach successive Stellar Warp Zones which transport you even deeper into the vortex. Avoid the deadly Gamma Rays and Lamda particles to survive your epic journey to the far side of the vortex.

BBC ONLY
SPECIAL OFFER PRICE   £2.99 - CASSETTE ONLY

Beach-Head - A challenging naval battle which allows you to land your troops.   If you succeed the most difficult challenge still remains - capturing the enemy fortress of Kuhn-Lin.

Webwar - A fast-moving 3D vector graphic space game - over 256 increasingly faster and more difficult levels.   Have you got what it takes to complete the mission and achieve the status of Defender of the Web?

BBC/ELECTRON

Rig Attack - is an action-packed game with superb graphics and scrolling screens demanding skill and quick reflexes to guide your helicopter from rig to rig without coming under attack from enemy submarines.   The submarine is equipped with the latest missiles.   Your 'copter carries short range bombs that need to be dropped at a low altitude to reach the darting submarine in the waters below.

Alphatron - As head of Base security your task is to intercept enemy missiles before they reach the Trilithium Refinery.   Your . Targa-2 Scout Craft is equipped with guidance, fuel, plus radar computers to aid you in your seemingly endless task.

Santa's Delivery - An ideal Christmas tape for the children. It's Christmas Eve and Santa once again performs his Yuletide task.   Life, however, isn't that easy, icicles, snowballs and roaming snowmen make life very hazardous on the slippery rooftops.

Trek II - As Commander of a Federation Starship, your mission is to travel through the six galaxies in search of a long lost Starship Captain.

Space Caverns - Fly your Spacecraft through numerous caverns to reach your Homebase.   The longer a player survives, the more points he scores.   Every time a round is complete, the gravity is increased.

Cylon Invasion - Destroy the oncoming Cylon fleet before their Energy bombs reach the Earth.   Each Energy bomb which hits the Earth will reduce the Earth's shields until they glow red and eventually collapse causing the Earth's destruction.   Each wave gets progressively faster up to wave 10.

Woks - A tyrant Emperor has confiscated all the Woks in his Palace, to put his subjects on a diet.   The woks are hidden in nine guarded rooms - your job is to release them.

The Great Wall - A great wall divides two nations at war.   You have to cross the wall whilst avoiding rocks, arrows, guards, cannon balls etc.   There are eight levels, each level has sixty four sections.

BOOKS

DISCOVER YOUR ELECTRON by Philip Williams
This book is designed for Electron users who want to begin writing their own programs. It assumes a working knowledge of the keyboard and the machine's basic functions.
Discover your Electron makes full use of the machine's sound and graphic capabilities and prepares the user for advanced programming with a wealth of hints and tips. R.R.P. £2.95 **Tynesoft Price £1.95**

VERY BASIC BASIC - The first 15 hours on your Electron by Derek Ellershaw and Peter Schofield
This book is designed to guide the new Electron user through the first few weeks of programming - from the moment the machine is plugged in to a proficiency in basic programming.
Very Basic Basic is essential reading for any first-time Electron user, it manages to avoid technical jargon and is also great fun to use. All example programs are presented in quiz, game or self-questionnaire form, fully illustrated for easy reference. R.R.P. £2.95 **Tynesoft Price £1.95**

INSTANT ARCADE GAMES FOR THE ELECTRON by Jean Frost
With little or no knowledge of BASIC, you can still take a suite of 'skeleton' programs and create your own arsenal of dynamic and totally unique arcade games.
Instant Arcade Games offers an invaluable library of imaginative subroutines and user-defined graphics to enhance the efficiency and visual impact of their games programs. R.R.P. £3.95 **Tynesoft Price £2.95**

PCW GAMES COLLECTION for the Electron by PCW
If you are a games addict continuously on the prowl for more and better games or looking for your first collection of listings to type in - look no further.
This sparkling collection will keep you busy for a long time. Some of the best programs that have ever appeared in the well-known magazine Personal Computer World have been converted for your computer and put together here in this prize collection.
Test your reflexes on arcade-style games or test your wits on strategy games - there is something here for everyone. R.R.P. £4.95 **Tynesoft Price £3.50**

THE BIG DISK BOOK - A simple guide to using your disk drive - By Jonathan Inglis and Ian Murray
The disk system for the BBC computer is powerful and complex and often confusing for the beginner. This simple book is designed for the first-time disk user. It explains all the commands available and the best way to use a disk drive. It covers all the different types of drive available and is easy to read and virtually essential for the new disk drive owner. R.R.P. £4.95 **Tynesoft Price £3.50**

DYNAMIC GAMES FOR YOUR ELECTRON by Neal Cavalier-Smith
An exciting collection of dynamic games for your Electron. With 30 great programs just waiting to be typed in and run, this book will give you hours of fun in the weeks and months ahead. R.R.P. £4.95 **Tynesoft Price £3.50**

THE WORKING ELECTRON - A library of practical programs by John Scriven If you own an Electron computer and are looking to put it to more serious use, then this is the book for you.
The Working Electron is based on a collection of solid, solphisticated programs in areas such as data storage, finance, graphics, household management and education. The programs have been designed to make the most of the Electron's special features. R.R.P. £5.95 **Tynesoft Price £3.95**

When ordering 2 books Postage and Packing FREE
When ordering 1 book Postage and Packing 50p. unless ordered with a tape or disk.
