ROM

## INTER-WORD

A Full-feature 'What You See Is What You Get' word processor. Driven by its own unique menu system, all major operations within INTER-WORD are easy to remember and easy to perform.

INTER-WORD is supplied on ROM for convenient 'instant' loading - no need for a disc except for saving and loading text..

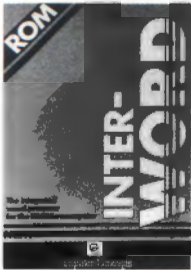

INTER-WORD is one of a series of ROMs originally produced for the BBC Micro and now converted to run on the Archimedes. Files created on previous BBC Micros are completely compatible.

And because INTER-WORD is part of an integrated suit of packages, files created by INTER-SHEET can be loaded into INTER-WORD.

**Some of the features include:-**

- Ruler-controlled margins and tabs
- On-screen display of printer highlights (bold, underline, italics)
- On-screen display of all text alignments (Left-aligned, centred, right-aligned and justified), all instantly available and constantly shown during entry and editing - no need for a separate preview.
- 40, 80 and 120 column screen modes.
- Multi-column printing facility
- Multi-file operation permits handling of very long documents.

**Existing owners may obtain a 20% discount, or a trade-in for £15.00 + VAT**

### Word Processor

**£39.00 + VAT  
(£44.85 incl.)**

DISC

## WORDWISE PLUS

By popular demand - Now available on disc for the Archimedes.

A 40-column word processor, with programming language -- very simple but very flexible and frequently useful.

**Existing owners: £10.00 + VAT when serial number is quoted.**

**£20.00 + VAT  
(£23.00 incl.)**

## INTER-SHEET

This is an easy-to use spreadsheet package, supplied in ROM. Originally produced for the BBC Micro, it is now available for the Archimedes.

Files can be easily transferred to INTERWORD for inclusion within documents, or to INTER-CHART to be displayed in various graphical forms.

### Features include:-

- Column widths are individually adjustable between 3-31 characters
- Full range of mathematical functions plus special functions such as SUM, MAX, MIN, AVERAGE
- 40, 80 and 132 character screen modes supported
- Any box, row or column can be locked against accidental changes
- Any area may be selected for printing

**Existing owners may obtain a 20% discount, or a trade-in for £10.00 + VAT**

### Spreadsheet

**£39.00 + VAT  
(£44.85 incl.)**

## INTER-CHART

A comprehensive chart and graph plotting program. Supplied on ROM, this popular program was originally produced for the BBC Micro and is now available for the Archimedes.

### Features include:-

- Data can be input from keyboard, or from file
- Supports Bar graphs, Pie charts and Line graphs
- Up to 16 graphs in memory at the same time. Any combination may be overlaid and printed
- Automatic or manual labelling. The user may add text at any position of the screen, then edit or move it

**Existing owners may obtain a 20% discount, or a trade-in for £10.00 + VAT**

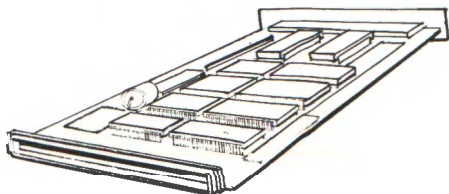

### Chart & Graph Plotting

**£25.00 + VAT  
(£28.75 incl.)**

## ROM PODULE

The Computer Concepts ROM Podule allows ROM and/or RAM chips to be plugged into an Archimedes Micro.

It is easily fitted by any competent user. A screwdriver is the only tool required - NO SOLDERING!

### Features include:-

- Easy to install. Full instructions supplied
- Accepts up to 7 ROMs / EPROMS / RAM chips, plus the on-board podule manager ROM (supplied)
- Accepts any combinations of 16K, 32K, 64K and 128K byte EPROM; 8K, 32K and 128K byte RAM chips
- Easy to configure (software includes auto-configure option)
- Designed fully to official Acorn guidelines and protocols
- RAM can be battery-backed by very simple addition of one chip and a small re-chargeable battery
- Full-feature RAM filing system supported. Up to 896K bytes (7 chips) can be plugged in and used to store files as if on disc and, if battery backup is fitted, these will remain intact when the computer is switched off.

Available  
soon

### Plug-in ROM Expansion board

£49.00 + VAT  
(£56.35 incl.)

**Note:-** The ROM podule requires prior installation of a 'Podule Backplane' (Contact us for details).

Available  
soon

## MEGA-3 ROM

The MEGA-3 package contains all manuals, keystrips, quick reference cards etc. normally supplied with each of the INTER-WORD, INTER-SHEET and INTER-CHART packages. However, *all* of the software is combined into a single 128K ROM, occupying just one ROM socket.

BOOK

## ARM Assembly Language Programming

This book contains all the necessary information for programming the new Acorn 'ARM' RISC processor in assembly language. With a whole chapter devoted to the BASIC-V assembler and examples in this format, it makes the ideal guide for anyone using an Archimedes Micro.

Some of the topics covered include:-

- Introduction: A simple introduction to assembly language, suitable for beginners
- Architecture: Details of the registers, flags, etc.
- Instruction set: A complete run-down of the various instructions, conditional execution, stack handling, the barrel shifter, load and store operations, add and subtract, etc...
- The BBC BASIC-V Assembler: Particularly useful to Archimedes users, this provides details of the assembler's syntax, options, multi-pass assembly, and so on...
- Programming principles: General theory and working examples of conditional execution, loops, branches and jump tables, subroutines and parameter passing

£12.95

200 Page BOOK

ROM

## Word Processor

The ultimate word processor (as yet unnamed!) for the Archimedes.

The list of features is almost endless. A more detailed specification will be available nearer the time of release. Some of the features include:-

- Operates entirely within the windowing environment
- Fully formatted document on-screen
- Any scaled view available whilst editing
- Uses Acorn fonts, sizes, styles, etc.
- Style definitions
- Multiple documents available simultaneously, and multiple windows into the same document
- All cursor movements performed by mouse or keyboard as required
- Text arranged flexibly within a system of re-sizable frames
- Graphics can be placed within text
- Graphics can be imported from the Computer Concepts Drawing package
- Flexible headers, footers, footnotes, endnotes
- Automated generation of contents page and index
- Optional thesaurus

Supplied in ROM.

ROM

## Drawing Package

An extremely versatile, accurate and easy-to use general drawing package for the Archimedes.

Operates entirely within the windowing environment

- Provides a wide variety of pre-defined shapes: rectangles, rounded rectangles, circles, arcs, ellipses, polygons, etc.
- Shapes can be filled or hollow, with or without border lines
- Lines can be of any width
- Any object can be moved, re-shaped, re-sized, rotated, have its border changed, have its fill pattern changed, etc.
- Fill patterns may be created, edited, saved and loaded
- Multiple drawings can be held in memory
- Drawings may be operated upon at a wide variety of scaling factors

**INCLUDES A FULL PROGRAMMING LANGUAGE.**
