The Business Centre, Claughton Road, Birkenhead, Wirral, England, L41 6EY.
Telephone: 051-647 8616/7/8 : 051-647 5574 Telex: 628761 BULTEL G

The TRIPLE 'S' is a computer peripheral as never before envisaged,
a universal device that:-

STORES - listing paper.

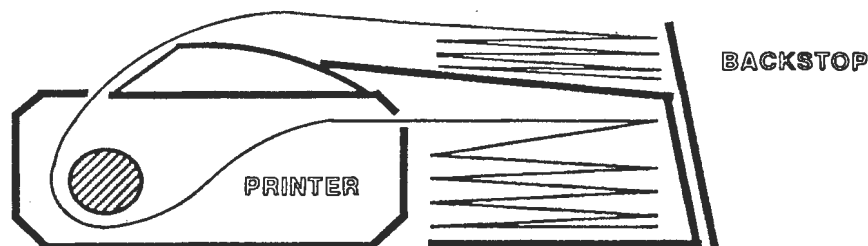

SEPARATES - the incoming and outgoing paper, avoiding those all too annoying paper tangles.

STACKS - up the finished printouts.

Triple "S" - Operational Instructions.

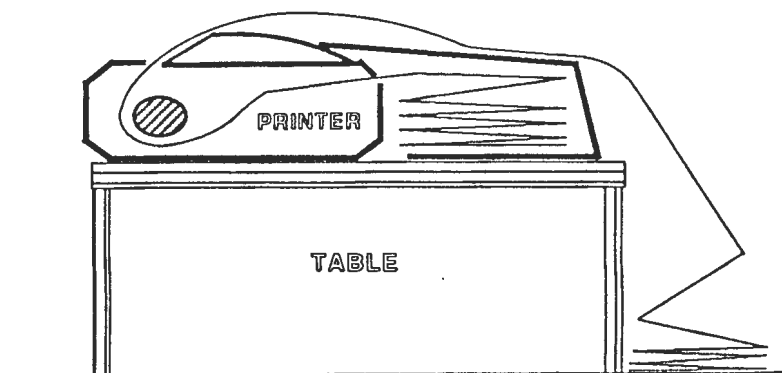

Examine the diagram and set up the TRIPLE 'S' with the top shelf resting on the rear of the printer.

Adjust backwards and forwards for best results.

Long Print Runs.

By removing the backstop and allowing the paper to cascade over the TRIPLE 'S', long print runs may be undertaken with little attention or fear of tangling.

TRIPLE 'S' - From the makers of 'THINGI' and 'MOUSEPAD'
