

# **THE MICRO USER**

*... shows you how to  
unleash the power  
of your BBC Master  
and Master Compact!*

Throughout five exciting years **The Micro User** has played a leading role in stimulating the continuing development of the BBC Micro, right from its early days as an educational machine to today's highly sophisticated Master and Master Compact.

During this period **The Micro User** has introduced many hundreds of thousands of new users to the delights and rewards of computing the BBC way.

Above all it has actively worked to encourage software houses all over Britain to produce a wider range of programs for the BBC Micro than for any other machine. The result is that with such a wealth of software the BBC Micro has been influential in

bringing the benefits of computing to an ever-increasing range of activities – in the home, in education and in business.

**The Micro User** itself has smashed one circulation record after another.

There is one big reason for its outstanding success: That is its helpful editorial approach. Its team of writers include some of Britain's top experts on the BBC Micro.

They have one other thing in common – an exceptional ability to make the most difficult subject easy to understand.

Plus a determination to use their knowledge and expertise to help push back the very frontiers of microcomputing. Over the years there have been numerous instances

***Subscribe today (and get a free bin)***

of creative ideas that first saw the light of day in the pages of *The Micro User* going on to revolutionise programming techniques.

Every issue of *The Micro User* contains pages devoted to detailed in-depth evaluations of the latest hardware accessories designed to expand the power and versatility of your computer, together with reviews of all the new software releases – arcade, adventure and simulation games, educational programs and new packages for the business user.

For readers who like to key in program listings for themselves, each issue contains clearly printed listings of one and often more games, as well as several time-saving utilities.

And there are dozens of invaluable hints and tips that encourage you to make the most of your computer in ways you never thought possible.

Over the months *The Micro User* builds up into a unique reference library that is always on hand to help and guide you through the intricacies of programming and in exploring to the full the potential of your new machine.

It is on sale every month at your newsagents. But to ensure you receive your copy each month we suggest you take out an annual subscription. If you order on the form overleaf we will get your first copy off to you immediately – and send you a handsome free binder to keep your collection complete.

*Order) by filling in the form overleaf*

**This handsome  
binder** (worth £4.95)  
**comes FREE  
when you  
mail this form**
